

COLLISION AVOIDANCE

***REAL-TIME TECHNOLOGY TO
PREVENT COLLISIONS***

COLLISION AVOIDANCE

- Our collision avoidance solution works in real-time and alerts you to avoid potentially fatal accidents. To mitigate the risk of dangerous incidents, our solution educates drivers to avoid such situations in the first place.

- Using our solution you can reduce costs on maintenance and repairs that would have otherwise resulted from hazardous situations.

- It easily integrates with Digicore's telematics guru so that you have all your fleet data at your fingertips and saves you the hassle of working with multiple platforms.

- Finally, Digicore's collision avoidance solution improves the overall safety of your site not only by nudging the drivers to act right but also by educating the drivers to adopt safer ways of driving your fleet vehicles.

OUR PORTFOLIO

MOBILEYE 8 CONNECT

- Alerts drivers about an imminent collision with pedestrians 2 seconds in advance.
- Helps drivers keep a safe distance from the vehicle ahead and alerts them if the distance becomes unsafe.
- Alerts drivers of an imminent collision with a vehicle ahead of them.
- Alerts drivers when there is an unintentional deviation from the driving lane.
- Recognises traffic signs and speed limits and notifies the driver if they exceed the limit.
- Identifies pedestrians and vehicles at night.
