

PORTABLE IVMS SOLUTIONS

A TAILOR-MADE SOLUTION FOR YOU

PORTABLE IVMS

- Portable IVMS is an area in which Digicore truly excels beyond our competition. Our bespoke suite of portable IVMS is the most advanced solutions available. Operating independently of the vehicle, they allow you to meet any site requirements.

- Our solutions allow us to pick up pretty much any requirement on a site today without needing to tap into any components or interfering with any circuitry and operating completely independently of the vehicle aside from drawing power from a 12V or 24V socket.

- Digicore will quickly adapt its solutions to match your needs using our extensive experience and knowledge.

PORTABLE IVMS

- Offers Driver ID, duress button, seatbelt pick-up, fatigue/journey management, speed zones within geo-zones, harsh events (breaking, cornering and acceleration).

- Take our advanced portable unit to the next level by easily integrating an iridium edge for unmatched flexibility and constant connectivity.
