

DRIVER ID SOLUTIONS

MONITOR DRIVER BEHAVIOUR

DRIVE ID SOLUTIONS

- **Works together with our vehicle trackers** - Working in conjunction with our vehicle tracking systems, Digicore's driver identification will track not only your vehicles but also the drivers. This better enables you to enforce OH&S, not only on a per-vehicle basis but also on a per-driver basis.

- **Complements your IVMS efforts** - Digicore has a wide range of Driver Identification options to identify drivers in your vehicles for IVMS purposes.

- **Resource Friendly** - Our solution is incredibly resourceful as it will help with reducing costs on fuel, repairs and maintenance.

DRIVE ID SOLUTIONS

- **Maintain Compliance** - Our solution ensures that everything is in order as it alerts you about unauthorised usage, seatbelt usage, idling and more.

- **Easy integration** - Utilising Weigand and RS232, Digicore can use the existing ID cards at the site and use them for driver ID. This allows for easier driver ID management.
